## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al. in view of Wallner.

Walker et al. shows all of the limitations of the claims except for specifying a printing means and the use of a PIN.

Walker et al. shows a method and apparatus for executing electronic transactions. Figure 4 shows terminal 406 (transaction terminal), modem 416 (communications means), an input device 404, a video monitor 402, and a CPU 418 (processing means). There is also a trusted agent 18 (secure host). The disclosure, column 6, discusses and "escrow account" or a cryptographically enabled account (CEA)(debit account). Column 6, lines 46-48, states, "anyone can log onto a network and set up a transaction using a CEA." (accept funds via communication means). Column 9, lines 59-60, shows the establishment of a unique account number for a new CEA. The new accounts can and usually are associated with a contract (specific to a transaction). Funds may be withdrawn in whole or in part.

Wallner teaches a virtual POS terminal with a printer 224 in order to better document transactions and a PIN pad port 226 in order to enable the use of a PIN, which increases security.

Based on the teaching of Wallner, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Walker et al. terminals and system to incorporate a printer 224 at each terminal in order to better document transactions and a PIN pad port 226 at each terminal in order to enable the use of a PIN, which increases security.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
